SUMMARY

Experienced Software Engineer with 3+ years of expertise in Ruby on Rails, JavaScript, and PostgreSQL. Proven ability to design, develop, and deploy robust web applications. Currently employed at PTAG, seeking opportunities to leverage skills in a challenging and collaborative environment to drive innovative software solutions.

EXPERIENCE

Software Engineer | PTAG

December 2023 - Present, Markham, ON

- Developed and deployed 5+ new features in the Waste Management System using Ruby on Rails, improving system efficiency by 30% and reducing user-reported issues by 25%.
- Implemented and maintained 100+ automated test cases using Rspec on the Waste Management system, reducing production bugs by 40% and improving overall system stability.
- Spearheaded the migration of a ~400,000 line codebase from Rails 5 to Rails 7, enhancing system performance by 20%, enhancing security compliance, and reducing technical debt.
- Optimized ActiveRecord queries using eager loading and indexing in PTAG's internal application, reducing database query time by 50% and improving system performance.

Junior Software Engineer | PTAG

December 2021 - December 2023, Markham, ON

- Took over and revitalized a partially completed Waste Management tracking system, redesigning key components and leading the team to successfully deliver the project 5 months ahead of schedule, increasing system reliability by 40%.
- Revitalized a partially developed Waste Management tracking system, reducing project delivery time by 20% through streamlined workflows.
- Managed and mentored a team of two developers, leveraging pair programming, strategic task delegation, and code reviews to enhance collaboration and boost overall productivity by 25%.
- Enhanced database efficiency by 30% through SQL query optimization and Rails migrations, resulting in a 50% reduction in deployment time.
- Automated the weekly production release process, reducing release-related issues by 15% and improving system stability.
- Optimized front-end performance by upgrading from Bootstrap 3 to 5, enhancing responsiveness and cutting page load times by 30%.

IT Developer Intern | PTAG

September 2021 - December 2021, Markham, ON

- Implemented best coding practices, reducing code complexity by 20% and improving maintainability.
- Collaborated with a team of developers to identify and eradicate critical software bugs, enhancing system stability and user satisfaction.
- Built and deployed a sample Ruby on Rails project, enhancing hands-on knowledge and contributing to team development practices.

Junior Systems Analyst | Magna Powertrain Inc

August 2020 - December 2020, Markham, ON

- Investigated and resolved system issues using diagnostic tools, reducing downtime by 20% for critical operations.

EDUCATION

Bachelor Of Technology - Software Development | Seneca College

North York, ON, 2021

SKILLS

Front End: HTML, CSS, Bootstrap (v3-5), Tailwind CSS, jQuery

Back End: Ruby on Rails, PostgreSQL, Javascript

Leadership: Technical Decision-Making, System Architecture, Strategic Planning, Team Collaboration
